

Tangens Whippets

*Newsletter #14
July - August 2011*

This Newsletter will be short. We are nowadays commuting between Santa Barbara County and San Diego County with all the dogs. That, and caring for a litter of puppies, now 11 weeks old, have kept me very busy.

Future Whippet Movie Star?

One of the puppies in litter 2011, *Tangens Carmen Fantasie*, was sold to an animal trainer, who is working for *Birds & Animals Unlimited, Inc.* They train animals for movies, and you may find a long list of famous movies with animals on their web site: <http://www.birdsandanimals.com> "Hotel for dogs" is my favorite.

Balancing act

I have only seen two dogs brave enough to balance on the edge of our pool. The first one was Tiffany, "Reina" (*Tangens Breakfast At Tiffany*; litter 08), who did it already as a young puppy. Recently, her uncle "Fess" (*Tangens The Wild Frontier*; litter 05) came to visit at 6 years of age. It didn't take him many minutes before he was doing the same thing. Must be genetic!

Fess recently moved to his new home where he has the company of two older Whippets in addition to several other species of animals. As long as the chicken don't run, he won't chase them ...

Is this crate training?
